

South Africa Data Center Cabinet Power Distribution System Construction Case

Overview

Basic starter range PDU are a low cost solution and available in variety of configurations to suit many different data centre or server room requirements. Intermediate range PDU includes I.P. monitoring via Ethernet, built in webserver, and an LCD screen displaying amps & watts. Using monitored PDU in your data centre or server room allows you to monitor your power usage, helping to improve efficiency, uptime and growth. Top level range PDU includes I.P. monitoring, webserver, LCD screen displaying amps & watts, power cycling and reporting down to each receptacle. Power supplies internally mounted within server room or data centre cabinets come in a variety of different configurations, and offer functionality on many different levels. PDU's such as ATS or STS can help increase resilience for server of network hardware with single PSU's. In Line Static Transfer Switches (STS) or Automatic Transfer Switches (A.
