

Special tools for fiber optic cable laying reels

Article Overview

Specialized tools for fiber optic cable laying reels include cable caddies, reel stands, tensioners, and hand tools designed to ensure safe, efficient deployment and handling of fiber optic cables.

Cable Handling and Deployment Tools

Cable caddies and reel stands are essential for managing fiber optic cable reels during installation. They allow smooth unspooling of cables, prevent tangling, and reduce stress on the fiber, which is critical to avoid microbends or breaks. Some setups include tensioners and guide rollers to control the pulling force and maintain proper alignment when laying cables over long distances or through conduits .

Installation and Preparation Tools

Before laying fiber, cables often require preparation using jacket strippers, shears, and scribes to remove protective layers and expose the fiber without causing damage. Cable pullers and winches are used for larger outdoor installations, especially when deploying backbone or long-distance cables . For indoor or smaller projects, hand tools and compact kits are sufficient.

Splicing and Termination Tools

Article Content

Fiber Optic Cable Reels

With next level engineering, our Fiber Optic Cable Reels exclusively manufactured by OCC are guaranteed to suffice as a lucrative

Cable Installation Tools

Proper Fiber Optic Cable Pulling Tools are essential for any large-scale bulk Ethernet or fiber installation. Having the correct tools is

Fiber Optic Tool Kits and Accessories

Choose accessories for your next fiber optic installation, including cable fiber access tools, tool kits, polishing film, cleaning

Fiber-optic cable installation tools for aerial, underground projects

General Machine Products Company recently introduced reel-handling accessories for the aerial and underground placement of fiber

Fiber Optic Cable Installation Equipment Suppliers India

Searching for underground cable laying equipment in India. Contact us we supplies & manufacture cable installation tools in India at

Tools for Cable and Fiber Preparation

In the process of installing and preparing fiber optic cables for fusion and mechanical splicing, a number of special tools are required.
