

Steel cable tray price

Article Overview

Steel cable trays typically range from USD 20 to USD 80 per meter depending on type, material, and load capacity.

Steel cable trays are widely used in industrial and commercial applications due to their durability, load-bearing capacity, and resistance to harsh environments . Prices vary based on factors such as material (galvanized, stainless, or electrogalvanized steel), tray type (ladder, perforated, or wire mesh), and duty rating (standard or heavy-duty) .

Typical Price Ranges

- Standard Galvanized Steel Trays: Around USD 20–40 per meter, suitable for general industrial and commercial use .
- Heavy-Duty Steel Trays: USD 50–80 per meter, designed for high-load applications such as oil, gas, and large manufacturing facilities .
- Stainless Steel Trays (304/316): Higher-end, often USD 60–100 per meter, offering excellent corrosion resistance for outdoor or chemical environments .

Factors Affecting Price

- Tray Type: Ladder trays are generally more expensive than perforated or wire mesh trays due to material usage and structural strength .
- Finish and Coating: Hot-dip galvanized trays provide superior corrosion protection, slightly increasing cost compared to electrogalvanized or plain steel .
- Load Capacity: Heavy-duty trays designed for large power cables or industrial setups cost more due to thicker steel and reinforced construction .
