

Steel long-span cable trays available for supply

Overview

The self-locking reinforced cable trays are available in channel, tray, and ladder types. Support spacing is customizable. Ladder-type. Cable Trays are designed to meet most requirements of cable and electrical wire installations and comply to local and international standards of fabrications and finishes. SFSP cable trays and accessories from SFSP are manufactured from steel sheets in accordance with BS EN 10130/BS EN 10131/ BS EN. Long-Span Cable Tray is engineered to span large distances (typically 6m+ between supports) without compromising structural stability. Suitable for high-bay warehouses, stadiums, bridges, and industrial facilities with limited support points, it efficiently supports heavy cable loads (power cables). Long-span cable trays have a larger support span than ordinary cable trays, with a more sophisticated structural design and greater load-bearing capacity. For spans over 6 meters, special orders are accepted. Materials can be galvanized, Al-Zn-Mg, stainless steel, or aluminum alloy.
