

Supplier of grounding distribution boxes from manufacturers in West Asia

Article Overview

Reliable grounding distribution boxes can be sourced from manufacturers such as DOHO, Asiatic Group, and verified suppliers listed on Asia Trade Directory, offering IP65/IP67-rated, corrosion-resistant, and customizable solutions.

Key Manufacturers and Suppliers

DOHO Electric is a major manufacturer of distribution boxes, including power and grounding boxes, offering both standard and custom solutions. Their products are widely used in industrial, solar, wind energy, and data center applications. DOHO adheres to international quality standards (ISO 9001, 14001, OHSAS 18001) and provides OEM/ODM services, ensuring products meet specific requirements for durability and safety. Asiatic Group supplies high-quality enclosures and distribution boxes suitable for harsh environments. Their products, including ENYCASE cable junction boxes, are made from thermoplastic polystyrene or polycarbonate, offering IP65 to IP67 protection against dust and water. These boxes are UV-resistant, halogen- and silicon-free, flame-retardant, and double-insulated, making them ideal for grounding and low-voltage power distribution. Alibaba Verified Suppliers offer a wide range of grounding terminal boxes, including weatherproof and corrosion-resistant models with copper busbars and IP65/IP66 ratings. These suppliers provide adjustable and recessed grounding boxes suitable for residential, commercial, and industrial installations. Asia Trade Directory is a useful platform to locate verified manufacturers and trading houses across West Asia. Buyers can filter suppliers by certifications, product types, and shipping capabilities, making it easier to identify local or regional manufacturers who can supply grounding distribution boxes.
