

Telecommunication Tower Inspection Fees

Overview

Buyers typically spend each inspection in the mid-range hundreds to low thousands, depending on tower height, scope, and data deliverables. In 2026, the most practical transmission tower inspection strategy is a hybrid model: use drones for routine visual and thermal surveys at \$30-\$150 per structure, and add IoT sensors on critical 110kV and 220kV assets where payback is typically 2-5 years. Our certified climbers have the skills and experience to. # The prescribed fees are subject to revision from time to time. * The handling fee for each investigation report will be capped at \$229. Tower inspection using drone technology has emerged as a game-changing solution, replacing dangerous manual climbing with efficient aerial data collection.
