

The ladder is a cable tray

Overview

A cable ladder, also known as a ladder cable tray, is a support system that consists of two longitudinal side rails connected by individual rungs. These rungs are spaced at regular intervals and provide a structure that resembles a ladder—hence the name. With experience in the electrical industry, I've found choosing the correct cable management solution critical to maintaining. When it comes to cable ladders and cable trays there are a few fundamental distinctions that should make your choice easier. Read this short guide to find the right fit. Generally, cable ladders are preferred for supporting high volume or heavy cabling, especially if there are long spans between. There are several types of cable trays, including ladder, perforated, solid bottom, basket, and channel trays. Each cable tray type performs a different function and comes in various materials such as aluminum, galvanized steel, and FRP.
