

Three-year warranty liquid-cooled switch NRZ

Article Overview

Enterprise liquid-cooled switches, such as NVIDIA Q3450-LD or Cisco 51.2T, can be covered by a three-year hardware warranty, ensuring repair or replacement for defects under normal use.

Warranty Coverage

Many enterprise vendors offer three-year warranties for high-performance networking hardware. For example, H3C provides a three-year warranty for IT hardware, including options for parts replacement, with the customer responsible for shipping defective components to the service provider . Similarly, Huawei offers extended hardware warranties up to three years, covering defects in materials and workmanship, with repair or replacement at the company's discretion . These warranties typically start from the shipment date or service request date and are non-transferable.

Liquid-Cooled Switch Features

Liquid-cooled switches are designed to handle high-density, high-throughput workloads while maintaining thermal efficiency:
