

Uganda Optical Amplifier QSFP-DD

Overview

This QSFP-DD dual pluggable EDFA booster amplifier offers a optical input range and provides a +20dB nominal gain to a C-Band DWDM link. The QSFP-DD OLS is a pluggable open line system solution that can be directly hosted on a Cisco router. Lumentum powers carrier optical networks, data center interconnects, and 5G fronthaul. The Cisco® QSFP-DD Open Line System (QSFP-DD OLS) is a pluggable optical amplifier module that, together with the channel breakout options (described later), provides a simple yet powerful open. These products feature four channels of 25G NRZ electrical signals and four channels of 25G NRZ optical signals, a duplex LC connector, a distance of up to 10km reach via single-mode fiber, a case temperature range of 0°C~70°C, and compliance with IEEE 802.
