

Ukrainian Optical Cable Marking

Overview

Footage released by the drone battalion of Ukraine's 63rd Separate Mechanized Brigade on December 19, 2025, reveals an extraordinary scene in Lyman, where streets, courtyards, and open spaces are draped in slender cables resembling a giant spider's web. Optical cables specially designed for pneumatic blowing into pipes and micro ducts. Due to their compact diameter, light weight and smooth outer sheath with a low friction coefficient, they provide minimal air resistance and efficient laying over long distances without additional connections. They. A Ukrainian front-line city has been smothered by a giant web of fibre optic cable from hundreds of drone battles in the skies. Video footage of Lyman, Donetsk, shows entire rows of houses and a field draped in sheets of translucent wire left behind by the aircraft. In this. The battlefields in Ukraine are being left strewn with 'spider web' like cables as a terrifying new type of weapon is being deployed.
