

Warranty for 10G core switch

Article Overview

Warranty coverage for 10G core switches varies by vendor, ranging from limited lifetime warranties to fixed-term hardware warranties, typically covering only the original purchaser and hardware components.

Vendor-Specific Warranty Details

EtherWAN EG97023 Series The EG97023 10G core switch comes with a limited lifetime warranty, covering the hardware for the life of the product. This warranty ensures reliability in harsh environments and applies to the original purchaser, providing flexibility and support for critical network deployments . Edgecore Networks offers warranties that are effective from the date of purchase and require proof of purchase. The warranty applies only to bare-metal hardware and is non-transferable. If a product reaches end-of-life (EOL), the warranty continues for 3 years from the EOL announcement. Users are encouraged to register products within 30 days to protect warranty rights .

Grandstream Networking Switches Grandstream provides a 3-year warranty for its managed and unmanaged switches, including Layer 3 aggregation and PoE models. This warranty covers hardware defects and ensures support for medium-to-large enterprise deployments .

Key Considerations

- **Coverage Scope:** Most warranties cover hardware only, not third-party software or services.
- **Original Purchaser:** Warranties are generally non-transferable and valid only for the first end-user.
