

Waterproof Rack Power Distribution System 2026 Model

Overview

Reliable, IP65-rated outdoor waterproof power distribution rack by RGB—designed for stage lighting, festivals, and outdoor events. This is a comprehensive catalog of all rack systems and rack power distribution. Standard. A server rack is a standardized metal enclosure designed to mount IT equipment—servers, switches, routers, PDUs, UPS systems, storage devices, patch panels, and cable managers—using vertical rails spaced according to the EIA-310 19-inch standard. The Geist™ Rack Transfer Switch automatically detects the loss of power and switches the power load to the alternative power source in less than 4-8 milliseconds without the need or human intervention. Modular, surge-protected, and certified for long-term stable performance.
