

Waterproofing of Water Pipes and Cable Trays

Overview

Waterproofing is essential for protecting cable trays from moisture damage. For joints, corners, and areas where water tends to accumulate, apply waterproof sealants or gaskets. Cable trays are support systems, creating a rigid route for cables and wires to travel from one point to another. As an alternative to conduits, cable trays are preferable as their open nature makes it easier to change wiring or install new cables, as they can simply be laid in place, rather than. WSP weatherstops are designed to seal penetrations of any type in walls or floors by cable tray, cable conduit, pipe and/or bus duct. our solutions are easy to use and help you ensure safety, efficiency and operational reliability through all phases of your construction project. Seal cable penetrations with our modular firestop solutions, designed to create water-, smoke- and gas-tight barriers in.
