

What is the price for overhead fiber optic cable installation

Article Overview

Installing overhead (aerial) fiber optic cable typically costs between \$1.20 and \$2.50 per linear foot, translating to roughly \$40,000 to \$60,000 per mile.

Cost Breakdown

Materials: Fiber optic cable costs vary by type and strand count. Singlemode fiber is generally less expensive than multimode, while armored or high-strand-count cables increase the price. For aerial installations, cable material typically ranges from \$0.50 to \$3.00 per foot depending on specifications and environmental protection requirements . **Labor:** Labor is a major cost driver for aerial deployment. Installation involves pole attachment, splicing, and testing. Labor rates for aerial fiber installation generally range from \$0.70 to \$3.00 per foot, depending on route complexity, crew size, and regional labor costs . **Permits and Equipment:** Overhead installations require permits for pole attachment and may involve coordination with utility companies. Permit fees and equipment like OTDR testers or certification tools can add several hundred to a few thousand dollars per project . **Total Project Estimates:** For a typical aerial fiber run:

- Short runs (1,000–2,000 ft): \$1,500–\$5,000 depending on cable type and labor .
- Per mile: \$40,000–\$60,000 for standard aerial installation, including cable, labor, and basic testing .
- Premium projects: Longer runs with armored cable, multiple splices, and professional testing can reach \$11,000–\$14,500 for 5,000 ft, scaling proportionally for longer distances .
