

What router speed is best for a 500m fiber optic connection

Overview

We recommend the TP-Link Archer BE900 as the best router for fiber internet. It's one of the best Wi-Fi 7 routers we've tested, with outstanding speed, excellent range, and a quad-band design built to take on multi-gigabit internet. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. For budget-conscious. Your gigabit fiber plan is being choked by a router that cannot keep up.
