

What router speed is needed for a 200Mbps fiber optic broadband connection

Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. There are several routers available in the market that can handle 200 Mbps internet speeds. Some popular options include: 1. I worked with the Cybernews research team to review and compare different routers and give. A good router designed for fiber-optic connections will remove bottlenecks, maintain stable speeds, and provide reliable coverage throughout your home or office.
