

What type of distribution box is

Article Overview

Distribution boxes (DB boxes) come in various types based on mounting style, phase, and application, including surface-mounted, flush-mounted, pole-mounted, single-phase, three-phase, lighting, power, and control distribution boxes.

Overview

A distribution box is an electrical enclosure that safely distributes power from a main supply to multiple circuits, protecting equipment and users with devices like circuit breakers, fuses, RCDs, and RCBOs . It is essential in residential, commercial, and industrial settings, and can also integrate smart features for energy monitoring and home automation .

Common Types of Distribution Boxes

1. By Mounting Style

- Surface-Mounted DB Boxes: Installed directly on walls; ideal for retrofits and industrial environments .
- Flush-Mounted DB Boxes: Embedded into walls for a clean, aesthetic look; commonly used in residential and commercial buildings .
- Pole-Mounted DB Boxes: Designed for outdoor applications like street lighting and utility distribution .

2. By Electrical Phase

- Single-Phase DB Boxes: Suitable for homes and small commercial loads; handle lower power requirements .
- Three-Phase DB Boxes: Used in industrial or large commercial facilities requiring higher power capacity .

3. By Function
