

Where are Moroccan optical cables manufactured

Article Overview

Moroccan optical cables are primarily manufactured by FBR Cables at facilities in Berrechid and Bouskoura, Morocco.

Key Manufacturing Facilities

Berrechid Facility: FBR Cables inaugurated a new industrial unit in Berrechid in February 2026, dedicated to the production of fiber optic and network cables. The plant spans 15,000 square meters and is equipped with state-of-the-art technology. It has an annual production capacity of 70,000 kilometers of fiber optic cables, covering nearly 60% of Morocco's domestic demand. This facility is fully Moroccan-owned and was developed using local capital and expertise, reinforcing the country's industrial and digital sovereignty . **Bouskoura Facility:** FBR Cables' original site in Bouskoura continues to operate, combining advanced equipment with rigorous quality standards. It produces a wide range of fiber optic cables for indoor, outdoor, aerial, and FTTH (Fiber to the Home) applications, as well as high-performance copper LAN cables (Cat6 to Cat8). This facility has been central to supporting Morocco's telecom operators, including Orange Maroc, INWI, and Maroc Telecom .
