

Which is better cable TV or fiber optic cable

Overview

In conclusion, fiber optic TV is generally better than traditional cable TV, offering faster speeds, higher quality video, and a more reliable connection. These cables are made up of thin glass or plastic fibers that are designed to transmit data as light signals. We'll compare the two in detail so you can decide which connection is the best for you. Selecting the right one often feels confusing, but a proper choice drastically improves your daily online experience. Cable utilizes familiar copper wiring originally built. Fiber internet connections and cable internet connections have a few key differences that affect their download and upload speeds, which then affects the cost of each.
