

Width of cable trays in the Middle East

Overview

In the UAE and KSA, a typical steel ladder or perforated cable tray comes in standard lengths of 2,440 mm and 3,000 mm. Widths offer far more variety, usually ranging from a narrow 50 mm up to 1,200 mm. Common side depth (or height) options are 50 mm, 75 mm, 100 mm, 150 mm, and 300 mm. These metric. Selecting the correct cable tray dimensions is a foundational decision in any electrical installation across the UAE and GCC. Get it right, and you establish a safe, reliable framework. A miscalculation here can compromise safety, budget, and future scalability. A well-sized system does more than just hold cables—it organizes, supports, and protects them, preventing. Wescosa designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Dammam Saudi Arabia. All trays are manufactured and tested in accordance with the latest NEMA and IEC 61537 Standards.
