

Wiring of surge protector in distribution box

Overview

It is very important to follow the manufacturer's installation instructions. Pay particular attention to fuse or breaker requirements and lead lengths. Surges may occur due to lightning strikes, power interruptions, or grid switching activities, causing a sudden spike. For all other cases SPDs shall be fitted to protect against transient overvoltages, unless the owner of the installation declines such protection and wishes to accept the risk of damage to both wiring and equipment as tolerable. more In this informative YouTube video, we. A single power surge can destroy your TV, computer, or even your entire electrical system within seconds. That is why understanding how to install a surge protection device is so important.
