

Xiaomi Light Control Module

Article Overview

The Xiaomi Light Control Module enables smart, remote, and automated control of Xiaomi lighting devices through apps, voice assistants, and integration with other smart home systems.

Overview

The Xiaomi Light Control Module is designed to automate and remotely control lighting in a smart home environment. It works with Xiaomi smart bulbs, light bars, and other compatible devices, allowing users to turn lights on or off, adjust brightness, change colors, and set schedules via the Xiaomi Home app or connected smart assistants like Alexa and Google Assistant .

Key Features

- **Remote Control and Automation:** Lights can be controlled from anywhere using the Xiaomi Home app. Users can create schedules, timers, or triggers based on motion sensors or other smart devices .
- **Voice Control:** Compatible with Alexa and Google Assistant, enabling hands-free operation for turning lights on/off, adjusting brightness, or changing colors .
- **Customizable Lighting:** Supports multiple color temperatures (2700–6500K) and up to 16 million colors for Xiaomi smart bulbs, allowing preset modes like Christmas, Fireplace, or Ocean, as well as fully customizable scenes .
- **Energy Efficiency:** Xiaomi smart lighting devices connected to the module are designed to consume less power while maintaining high brightness, making them eco-friendly .
